

MASTER IN EDUCATION (MEd)

Major in GENERAL SCIENCE

Program Description

This is a non-thesis program designed to develop competent elementary and secondary teachers in General Science. The courses are designed to ensure that the students have a good grasp of the basic principles and concepts in their respective disciplines. In addition, they are exposed to the latest development in laboratory techniques and approaches in the teaching of General Science, Chemistry, Biology, Physical Science/Physics, and Math.

Program Educational Objectives

1. Update and enrich teachers'/students' theoretical and technical knowledge in teaching General Science;
2. Enhance and expand pedagogical knowledge and skills necessary for the global market and workplace;
3. Provide educational experience directed towards the formation of Socially Responsible Christians; and
4. Develop innovative and creative innovating teaching approaches.
